**Subject:** FW: US-69 Muskogee Relief Route Preliminary Design and Estimate

All,

Below is a write-up of preliminary findings for the environmental impact. A representative from Cultural Resources will be attending the upcoming meeting to answer any questions that you may have. If you have any questions before, please let me know. Thank you.

Siv

Here are the preliminary findings of the environmental impact analysis. We will be preparing a more detailed matrix that we can use to prepare the public meeting materials. Please let me know if you have any questions. I will be out Wednesday of next week and unable to attend the status update meeting. Nick will be there and can bring KMZ files of these items. Thanks

Thru Town Alignment:

**Potential Major issue-** Avoidance of Plainview Cemetery is not certain with current EW-92 road tie-in

Other Notable Impacts:

- Approximately 72 Commercial – 4 residential relocations (not including 1 affected apartment complex and RV park)
- Multiple Community Facility relocations including 7 medical/dental/health clinics and a Muskogee Tourist Info Center
- Two site impacts (crossings) to likely Section 4(f) protected Muskogee Bike Trail (converted RR, not NRHP eligible)
- Multiple Haz Waste sites to be assessed
- Relatively low wetland and stream impact

Relief Route Alignment:

**Potential Major issues-**

- Proposed connector road along EW-92 currently shows substantial R/W impact to Summit Cemetery (Recon Cultural Report recommends complete avoidance)
- North end of relief route goes thru the east edge of confirmed archeological site 34MS22 which has yielded human remains (Recon Cultural Report states: "Inclusion of this archaeological site in the project footprint or the NEPA study area (APE) may delay project delivery.")

Other Notable Impacts:

- Approximately 2 Commercial – 45 residential relocations (including an RV community)
- Timothy Baptist Church relocation
- Moderate wetland and stream impact (no critical resource waters)

Are there any major environmental concerns on this?
